

The following URL handles all OrgDS SMS API calls for both API-N and API-X:

`https://orgds.com.ng/api`

The URL receives API requests and replies once required parameters are supplied. All parameters should be URL-UTF-8 encoded.

### API-N Authentication

The API-N authentication parameters are the *username* and *password* of the main account you are connecting to. The submission will look like:

**`https://orgds.com.ng/api?username=xxxxxxx&password=xxxxxxx`**

*Other required parameters for the API request will then be added.*

### API-X Authentication

The API-X is a token-based API that requires only sub-account API TOKEN for authentication. The submission will look like:

**`https://orgds.com.ng/api?token=APIX_xxxxxxxx`**

*Other required parameters for the API request will then be added.*
