

This section describes how to view a sub-account's credit balance using the API-X Credit Check API.

`https://orgds.com.ng/api?cmd=balance&token=APIX_XXXXXX`

API-X Credit Check Parameters

Response Message

When a successful Credit Balance call is made, the response will be a numeric credit balance of the API-X account. For example,

1234.12

If any error occurs, the error code and message will appear instead. [See possible error codes here.](#)

Sample API-X Credit Check PHP Code

```
<?php
    //Check SMS Credit Balance of API-X account
    $token = "API_TOKEN";
    $balanceUrl = "https://orgds.com.ng/api?cmd=balance" .
    "&token=".$token;

    if ($reply = file_get_contents($balanceUrl)) {
        echo $reply; //reply will be numeric credit balance on
the APIX sub-account
    }
?>
```
